

What is the Comprehensive Care Sustainability Collaborative (CCSC)?

- CCSC is a quality improvement and cost management initiative sponsored by the National Hemophilia Foundation (NHF)
- The aim is to augment the sustainability of Hemophilia Treatment Centers (HTCs) as Centers of Excellence by...
 - overcoming communication gaps to increase connectivity between payers and providers
 - disseminating standards of quality care, cost management, and the benefits of multidisciplinary management of hemophilia that will improve the recognition of HTC-derived value
 - providing transparent tools to manage total cost of care

Why is CCSC needed?

- To help advance the collaboration between payers and federally recognized HTCs to enable patient access to high quality care while providing data and needed transparency that can lower the total cost of care
- Assurance for health care purchasers that their employees/beneficiaries with hemophilia are being optimally managed by an HTC Center of Excellence

What are the Benefits of CCSC Participation?

- Improved quality of hemophilia care and stabilization or reduction in factor costs
 - Greater focus on the patients with severe hemophilia or those with inhibitors
 - Improved factor contracting price with HTCs directly vs. specialty pharmacy providers
- Better transparency to further mitigate risk and identify ways to lower total cost of care
- Access to advanced analytics on a rare, high-cost disease
- Increased connectivity with HTC directors and affiliated providers seeking more rigorous standards of quality care and cost containment for hemophilia and other rare bleeding or clotting disorders
